

Branched-chain amino acids (BCAAs) are often used in order to reduce muscle breakdown and increase muscle growth; however, they only provide mediocre results and require large doses. Super Chain<sup>®</sup> renders all other BCAA-type products obsolete. It optimizes the body's anabolic and recuperative processes by utilizing a revolutionary new branched-chain amino compound that delivers four times the results of traditional BCAA products with only 1/4 the dose. Why choke down 10–20 g of a BCAA supplement for middle-of-the-road results? Super Chain<sup>®</sup> only requires a few grams and delivers powerful, noticeable, real-world results.
